AYISHAT ODEKUNLE

Frontend Developer | React & Next.js | Fintech & Banking Domain Expert

aishat.odekunley@gmail.com LinkedIn GitHub Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 3 years of combined experience spanning software development and banking operations. Specialized in building scalable, user-centric web applications using React, Next.js, and TypeScript — with a focus on fintech, e-commerce, and SaaS platforms. My background in banking at UBA and Access Bank gives me a rare ability to translate complex financial workflows into clean, compliant, and intuitive interfaces that real users trust.

Key Strengths:

- Production experience delivering fintech platforms: agency banking, POS systems, KYC flows, and payment integrations
- Hands-on expertise building and maintaining reusable component libraries and design systems
- Track record of measurable performance gains — including reducing API response times by 40% and load times by 73%
- Deep understanding of banking compliance, transaction security, and customer pain points from frontline operations
- Effective remote collaborator across distributed, multicultural engineering teams

CORE TECHNICAL SKILLS

Languages & Frameworks

React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Node.js, Ionic Framework

Styling & UI

Tailwind CSS, Responsive Design, Mobile-First Development, Figma Integration

State Management & APIs

Zustand, REST APIs, GraphQL, WebSockets, Third-party API Integration

Tools & DevOps

Git, Webpack, Docker, Azure Functions, CI/CD (Jenkins/GitHub Actions), Jira, Confluence

Testing & Quality

Jest, Cypress, Karma/Jasmine, Unit Testing, Cross-browser Compatibility, Performance Optimization

Domain Expertise

Financial workflows, Banking operations, Transaction processing, PCI compliance, KYC standards

PROFESSIONAL EXPERIENCE

Baige Wallet **Remote**

Frontend Developer

October 2025 – Present

- Built comprehensive fintech platforms from scratch — including agency banking dashboards, merchant POS interfaces, and agent portals — using React, Next.js, and TypeScript
- Developed the main company website and secure admin dashboard with real-time transaction monitoring and role-based access control
- Integrated multiple payment gateways and banking APIs with PCI-compliant data handling, ensuring secure end-to-end transaction flows
- Achieved 95%+ mobile compatibility scores across all platforms through rigorous responsive and mobile-first implementation
- Partnered with backend engineers to architect RESTful APIs, cutting average API response times by 40%

Carlofty **Remote**

Frontend Developer

August 2025 – January 2026

- Built full user and admin platforms for an automotive e-commerce marketplace (**carlofty.com**) using React and Next.js
- Engineered a multi-step user onboarding flow with KYC verification, reducing drop-off through clear UX and inline validation
- Developed an automated invoice generation system that eliminated manual processing for admins and users, cutting processing time by 70%
- Integrated vehicle listing management, real-time booking, and payment processing with live status updates
- Delivered a full-featured admin dashboard covering analytics, user management, and inventory tracking

Ufone **Remote**

Frontend Developer

November 2024 – July 2025

- Designed and implemented responsive, accessible UI components for the Ufone main website and Ufone Store e-commerce platform using React, Next.js, TypeScript, and Tailwind CSS
- Built 15+ reusable components adopted across multiple product pages, reducing per-feature development time significantly
- Streamlined checkout navigation and flow, contributing to improved conversion rates on the storefront
- Collaborated with senior engineers and designers to deliver pixel-perfect Figma implementations while upholding code quality standards

BITS LIMITED **Remote**

Frontend Developer

Feb 2025 – April 2025

- Led frontend modernization of the Luminevnt v2 SaaS product using Next.js, TypeScript, and Zustand for state management
- Architected a reusable component library that standardized UI across the application and measurably improved team delivery speed
- Reduced JavaScript bundle size through targeted code-splitting and component restructuring
- Integrated REST APIs across complex multi-step workflows, ensuring consistent state synchronization and smooth user experience

UNITED BANK FOR AFRICA (UBA) On-site

Customer Experience & Operations Specialist

2022 – 2024

- Handled 50+ customer inquiries daily across digital and in-person channels, building deep empathy for pain points in financial UX
- Identified recurring process bottlenecks in customer onboarding workflows and collaborated cross-functionally to reduce resolution time
- Maintained strict adherence to banking regulations, data security standards, and compliance protocols — experience that directly informs how I build financial interfaces today
- Processed high-volume transactions with accuracy and accountability, developing the attention to detail essential for production-grade development

ACCESS BANK On-site

Customer Service Officer

2021 – 2022

- Served as primary point of contact for 100+ daily customer inquiries, resolving account, transaction, and digital banking issues
- Onboarded and managed 200+ new customer accounts with full documentation and regulatory compliance
- Guided customers on digital banking platforms, directly improving adoption of mobile and online banking tools

KEY PROJECTS

Ufuon STEM Store — E-Commerce Platform for Electronics & IoT

Professional Project

Live Demo

- Built the full e-commerce storefront for Ufuon — a STEM education platform empowering African students to build with electronics and IoT — using React and Tailwind CSS
- Implemented complete authentication flows (login, signup, logout) and a full shopping cart with add-to-cart functionality
- Integrated Paystack payment gateway for secure, localised checkout processing
- Developed product listing, filtering, and dedicated sections including About, Cart, and individual product pages

HNG Ticket Dashboard — Support Ticket Management App

Personal Project

Live Demo

- Built a responsive Ticket Management Dashboard with React and Tailwind CSS, allowing users to create, view, and filter support tickets
- Implemented authentication flow (login, signup, logout) with efficient state management for user and ticket data
- Designed for seamless use across desktop and mobile with a clean, intuitive interface

Dev Blog — Full-Stack CRUD Blog Platform

Personal Project

Live Demo

- Built a modern blog platform with full CRUD functionality using Next.js, TypeScript, Tailwind CSS, and Zod schema validation
- Implemented form validation with react-hook-form and Zod, and light/dark mode theming across the app
- Users can create posts with title, content, author, and image — rendered dynamically on the homepage

Movie Box — Film Discovery Platform

Personal Project — Next.js upgrade in progress

Live Demo

- Developed a film discovery app integrated with the TMDB API, featuring advanced search, filtering, and user watchlists
- Optimized API request handling and caching, reducing average load time from 3s to under 800ms — a 73% improvement
- Currently being rebuilt with Next.js and Tailwind CSS for improved performance and SSR capabilities

EDUCATION

Bachelor of Science — Mass Communication

National Open University of Nigeria

April 2024

National Diploma — Mass Communication

Yaba College of Technology, Lagos

January 2018 – July 2020

CERTIFICATIONS

- ALX Frontend Development Course (2024)
- HackerRank JavaScript Certificate (2024)
- HackerRank CSS Certification (2024)
- HackerRank Problem Solving Certificate (2024)
- Principles of Secure Coding (2024)
- Desktop Publishing Certification – Merit (2017)
